EXPORT PRODUCT CATALOGUE

**SUSPENDED
CEILING
SYSTEMS**

At Mallmartturk, we specialize in providing high-quality products to international markets. With years of experience in the export industry, we offer reliable, efficient, and competitive solutions tailored to meet the needs of our global clients. Our commitment to excellence ensures that we deliver the finest products, adhere to international standards, and maintain strong relationships with our partners across the world.

Let us help you expand your reach and grow your business globally. Trust MALLMARTTURK for all your export needs!

ABOUT US

About Mallmartturk,

As you all know very well, since our establishment as Mallmartturk, in all our areas of activity, we have always followed a corporate philosophy that drives us to make choices not just between good and bad, but between good and the best.

Our goal has been to add value to our country, to be among the internationally respected companies, and to fly the flag of both our country and our group in every corner of the world. We set our mission in line with this vision and have always moved forward with this goal. Of course, to achieve this, we had to adapt to change and continuously invest.

These investments were directed towards knowledge, innovation, technology, and most importantly, the value we place on people. In short, these were investments in MALLMARTTÜRK's future, which is also our future. Throughout this development process, we were always guided by our leadership principles: "Unity, Passion, Determination, Faith." When these four elements are at the core, the path to leadership becomes swift.

We know that a brand is born, grows, evolves, achieves success, gains trust, is accepted, and becomes lasting for generations through its mission and vision. Today, we take pride in working with the awareness of being a brand that has achieved leadership in every field in which it operates.

Respectfully,

Your Trusted Global Partner in Export Solutions

Suspended Ceiling Systems

Metal/wood suspended ceiling systems are ceiling solutions that combine aesthetic and functional features, giving interiors a modern and elegant appearance. These systems consist of durable metal/wood panels and are commonly preferred in commercial and public spaces such as offices, shopping centers, hotels, and hospitals. While providing fire resistance, metal suspended ceilings also assist with acoustic regulation and offer an ideal structure for concealing installations such as lighting, ventilation, and sprinklers. With easy assembly and disassembly, these ceiling systems simplify maintenance processes and stand out as a long-lasting and sustainable solution.

At Mallmartturk, we are dedicated to exporting premium quality building materials to markets worldwide. With a strong focus on reliability, innovation, and competitive pricing, we provide a wide range of construction products that meet international standards. Our extensive network and experience in the industry ensure smooth and efficient export processes, allowing our clients to complete their projects with confidence.

Choose Mallmartturk for trusted building material solutions that support your global construction needs.

Suspended Ceiling Systems WOOD

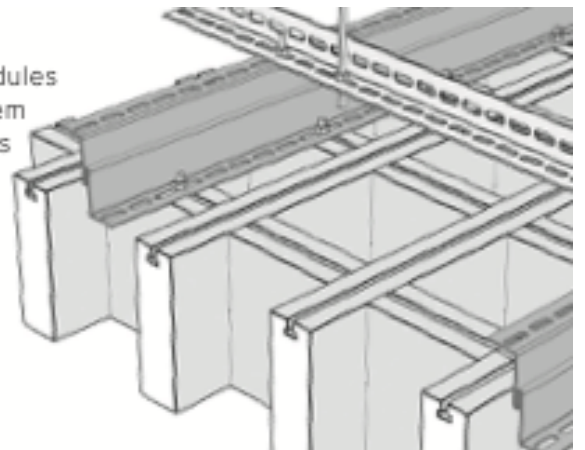

**LINEER
SİSTEM**
LINEAR
SYSTEM

01

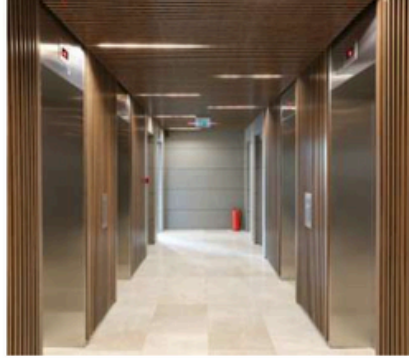

The linear system provides sound reflection and is a decorative architectural choice that allows acoustic application behind the modules in case sound absorption is requested. It is a widely preferred system for conference rooms, call centers, hospitals, meeting rooms, offices and schools.

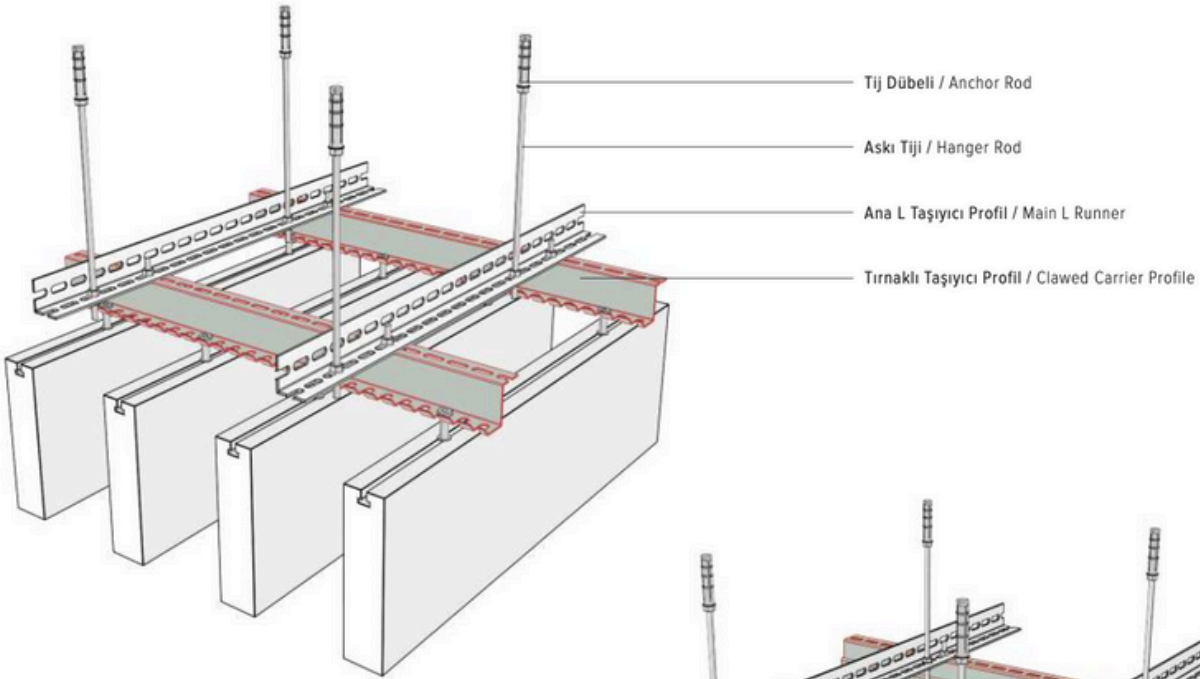

BAFFLE SİSTEM / BAFFLE SYSTEM

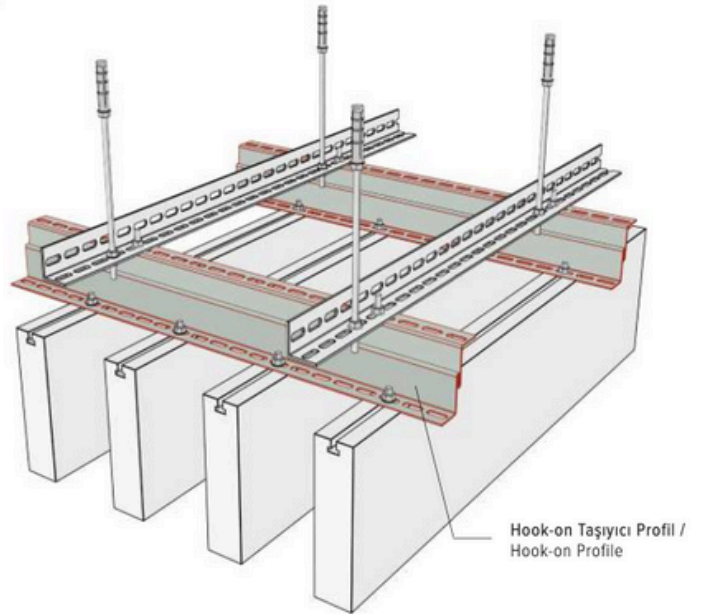

For the suspension system, two alternatives are offered: hook-on or clawed profile system. The hook-on system is easily demountable since it is modules, while in clawed profile system each slat provides modularity.

Sistem Bileşenleri / System Components

Tırnaklı Taşıyıcı Sistem / Clawed Carrier System

Hook-on Taşıyıcı Sistem / Hook-on System

Your Trusted Global Partner in Export Solutions

Baffle Lata Ölçüleri / Baffle Slat Dimensions

Boy / Length*	Kalınlık / Thickness	Yükseklik / Height
1200 - 1380 mm	20 / 30 / 40 / 50 mm	60 - 200 mm

* Farklı ölçüler için satış temsilcisine başvurunuz.
* Please contact the sales representative for special dimensions.

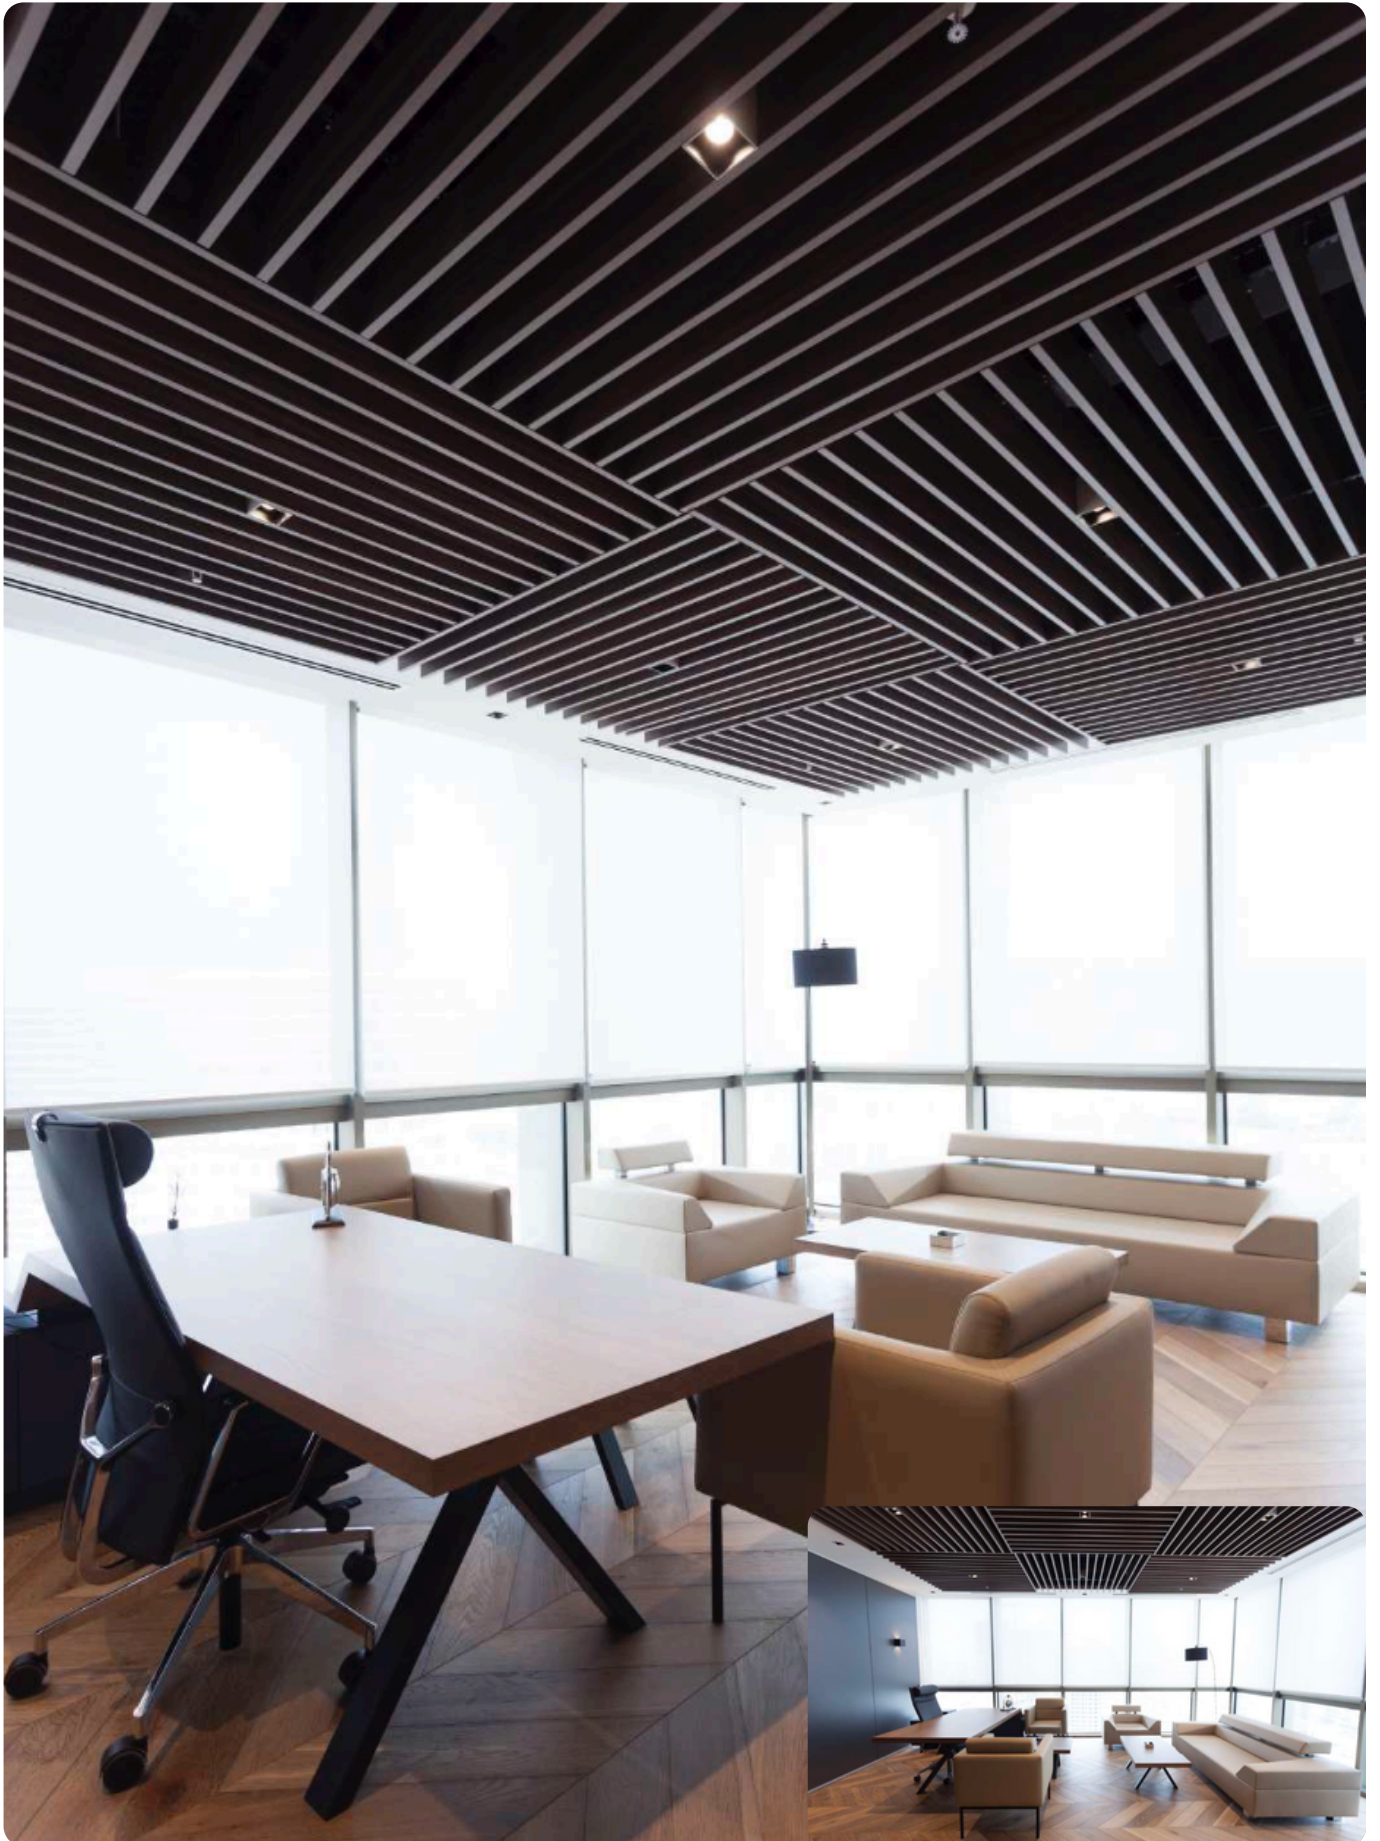

Malzeme Seçenekleri / Material Options

Doğal Kaplı MDF / Wood Veneered MDF, Lake Boyalı MDF / Lacquered MDF, Laminat Kaplı MDF / Laminated MDF, Masif Ahşap / Solid Wood, MDFLam / Melamine MDF

Your Trusted Global Partner in Export Solutions

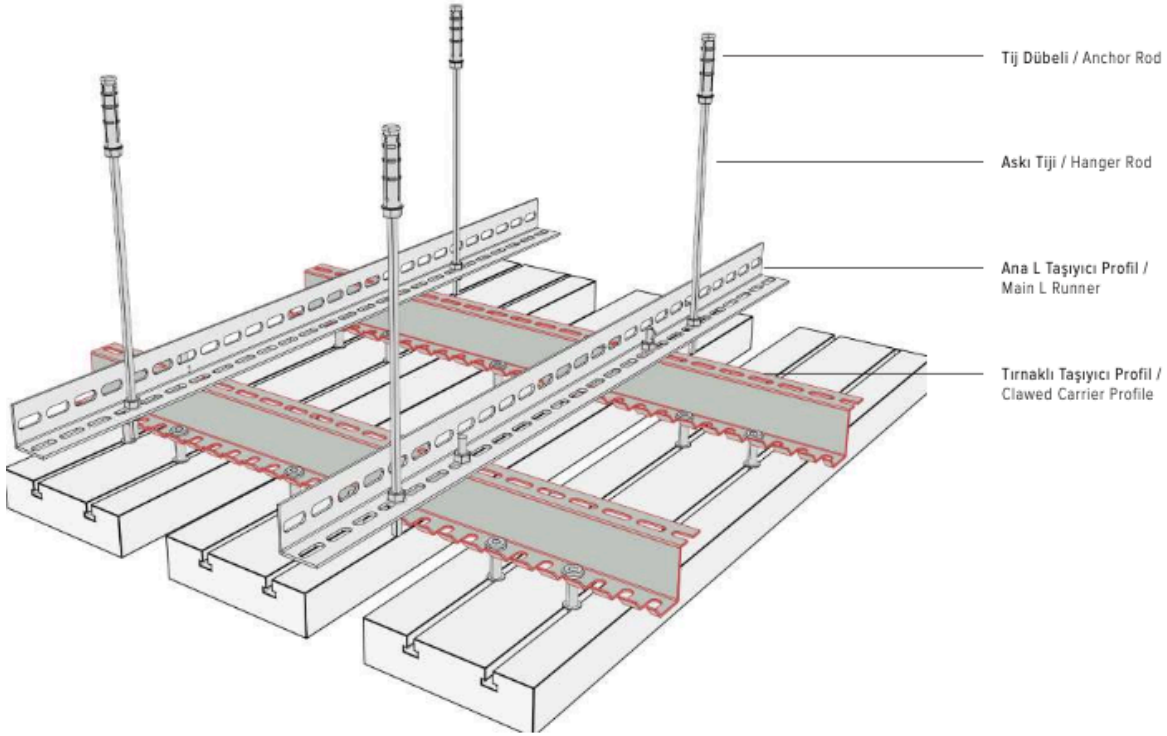

LAMEL SİSTEM / LAMELLA SYSTEM

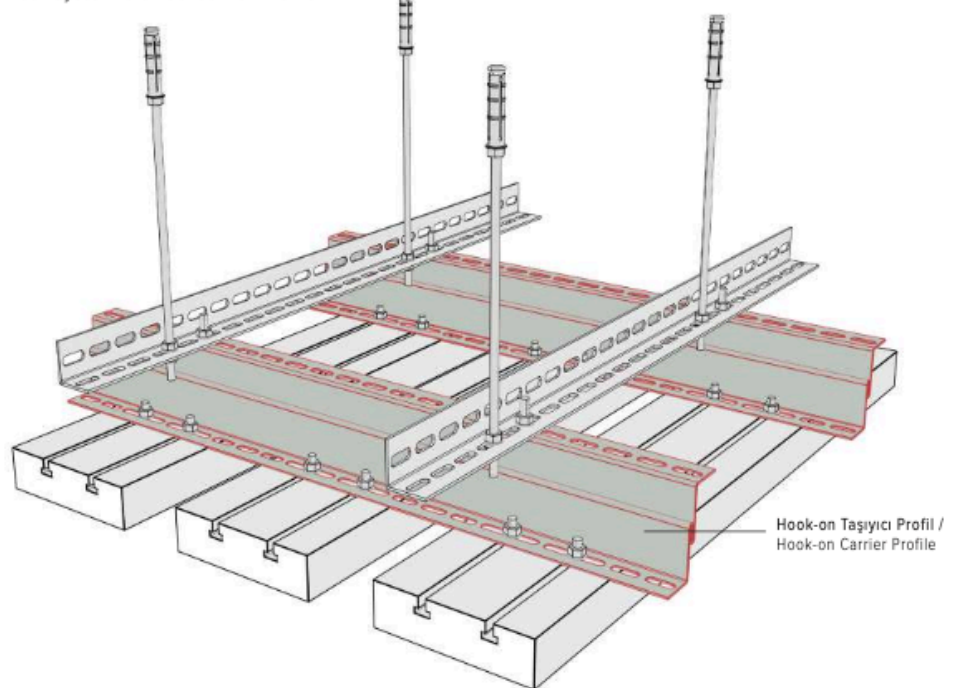

Taşıyıcı sistem olarak hook-on ve tırnaklı taşıyıcı sistem olmak üzere iki alternatif sunulmaktadır. Hook-on sistem modüller halinde sökülüp takılarak müdahale olanağı sağlarken, tırnaklı taşıyıcı sistemde her lata bağımsız olarak modülerlik sunmaktadır.

For the suspension system, two alternatives are offered, which are hook-on and clawed profile system. The hook-on system can be demounted in modules while in clawed profile system, each slat provides independent modularity.

Sistem Bileşenleri / System Components

Lineer Sistem Tırnaklı Taşıyıcı / Linear System Clawed Carrier Profile

Baffle Lata Ölçüleri / Baffle Slat Dimensions

Boy / Length*	Yükseklik / Height	Genişlik / Width
1200 - 1380 mm	20 / 30 / 40 mm	60 - 200 mm

* Farklı ölçüler için satış temsilcisine başvurunuz.

* Please contact the sales representative for special dimensions.

Malzeme Seçenekleri / Material Options

Doğal Kaplı MDF / Wood Veneered MDF, Lake Boyalı MDF / Lacquered MDF, Laminat Kaplı MDF / Laminated MDF, Masif Ahşap / Solid Wood, MDFLam / Melamine MDF

AKUSTİK PANEL SİSTEM

ACOUSTIC PANEL SYSTEM

02

Acoustic Panel systems can be produced in all sizes for the areas that demand high acoustic performance, with the perforation and joint options. These fully modular acoustic panels can be integrated into three different types of suspension systems. These are lay-in, grooved and concealed profiles.

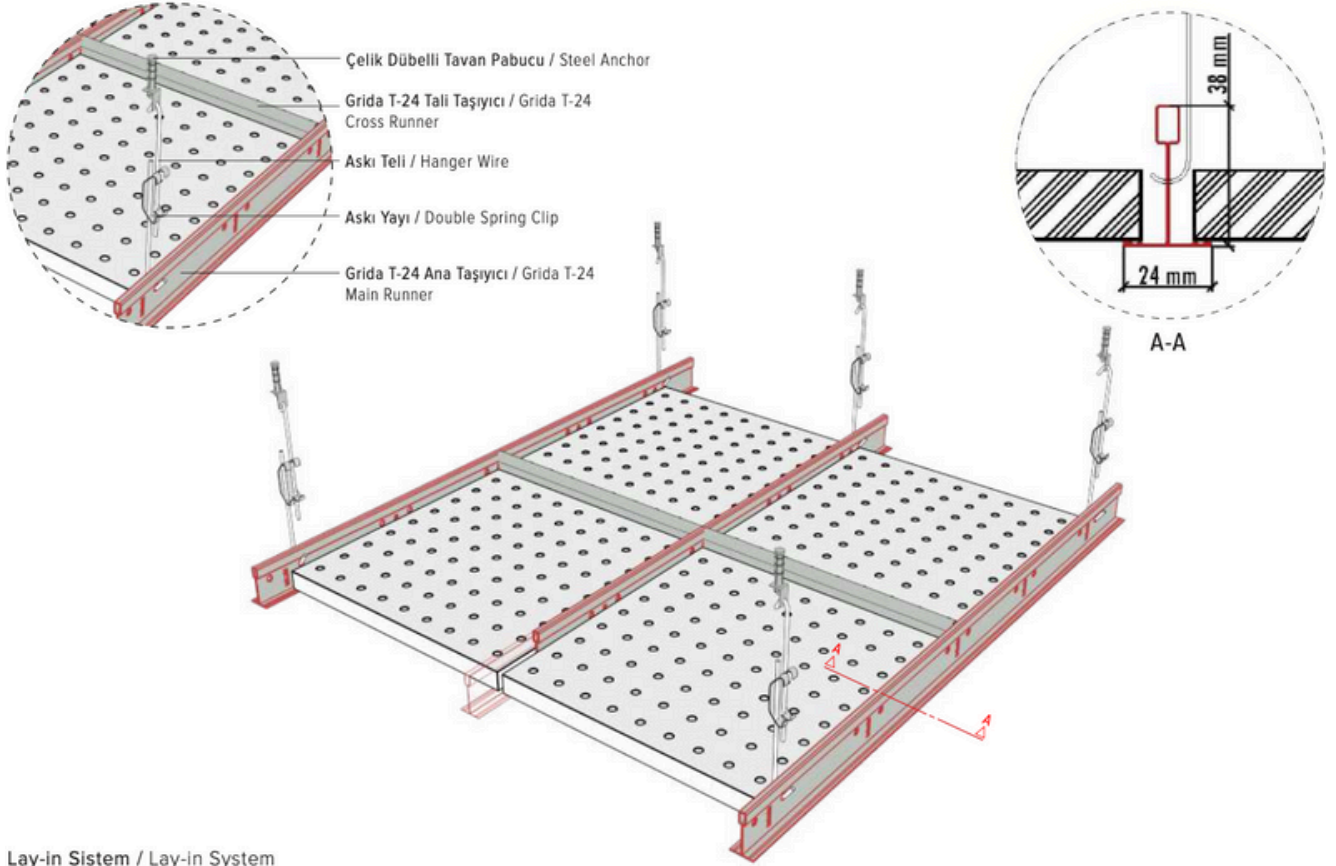

Your Trusted Global Partner in Export Solutions

LAY-IN SİSTEM / LAY-IN SYSTEM

Kenarları küt bitişli paneller T-24 taşıyıcı üzerine oturtularak taşınmaktadır. Panel ile uyumlu tonlarda boyanabilen görünür taşıyıcı ile hızlı ve kolay uygulama imkânı sunulmaktadır.

Panels having square edges are laid on the T-24 suspension system and can be easily demounted without the need for any tool. Grids can be painted to the desired colour to match with the colour of panels.

Sistem Bileşenleri / System Components

Lay-in Sistem / Lay-in System

KAPLAMA TÜRLERİ VE RENKLER

COATING TYPES AND COLORS

Sepia Ahşap Asma Tavan ve Duvar Sistemleri ürünlerine ait renk seçeneklerinin yer aldığı, doğal kaplama ve laminat kartelalarımızı satış temsilcilerimizden talep edebilirsiniz.

The Swatch cards showing laminated and natural wood covers with various colour options can be received from the sales department.

Your Trusted Global Partner in Export Solutions

DOĞAL KAPLAMA / NATURAL COATING

Doğal kaplamalar, tomruklardan soyma ve kesme yöntemleriyle elde edilen kaplamalardır. Kaplama boyutları ve metrajı kullanılan tomruğun özelliklerine göre değişmektedir. Aynı tomruktan elde edilen kaplamalarda dahi renk, ton ve desen farklılıkları olabilmektedir. Bu bir hata değil ürünün doğası gereği olan bir durumdur. Bu farklılığın sebepleri ağacın yetiştiği ortam koşulları ve genetik yapısal farklılıklarıdır.

Doğal kaplama kullanılacak projelerde panel ölçüleri belirlenip, ihtiyaca göre kaplama seçilerek onaylatılmalıdır. İlave sipariş olduğu takdirde aynı kaplama bulunamayabilir ve panel geçişlerinde renk ve desen farkları daha fazla belirgin olabilmektedir.

Doğal kaplama projelerinizde satış temsilcimizden numune isteyiniz.

Natural veneers are veneers obtained from logs by peeling and cutting methods. Veneer sizes and amounts vary according to the properties of the wood used. Even veneers obtained from the same log may have color, tone and pattern differences. This is not a fault, but a condition of the nature of the product. The reasons for this difference are the environmental conditions in which the tree grows and its genetic structural differences.

In projects where natural coating will be used, panel dimensions should be determined and the coating should be selected and approved according to the need. In case of additional orders, the same coating may not be available, color and pattern differences may be more pronounced in panel transitions.

Ask our sales representative for samples for your natural coating projects.

ENDÜSTRİYEL ALPİ KAPLAMALAR / INDUSTRIAL ALPY COATINGS

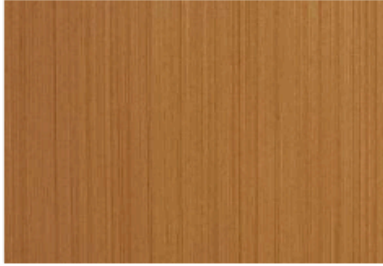

Endüstriyel kaplamalar, yenilenebilir doğal ağaç kaynakları kullanılarak, soyma, boyama, üst üste yapıştırma gibi tekniklerle yeni bir form haline getirilip, bu formdan kesme teknikleriyle elde edilen kaplamalardır. Endüstriyel kaplamalar, doğal ağaç kullanılarak farklı bir teknikle üretilir ve doğal ağaçların karakteristik özelliklerini korurlar. Doğal kaplamalara göre standart ebat, renk ve desen sürekliliği gibi avantajları vardır. Renk, ton farklılıkları minimize edilmiştir. Ayrıca yenilenebilir kaynaklardan elde edildiği için çevreci bir üründür. Bu özellikleri bakımından endüstriyel kaplamalar tercih edilmektedir.

Industrial coatings are coatings that are made into a new form by using renewable natural wood resources, using techniques such as peeling, painting, and gluing, and obtained by cutting techniques from this form. Industrial coatings are produced with a different technique using natural wood and retain the characteristic features of natural trees. It has advantages such as standard size, color and pattern continuity compared to natural coatings. Color and tone differences are minimized. In addition, it is an environmentally friendly product because it is obtained from renewable resources. Industrial coatings are preferred in terms of these properties.

LAMİNAT KAPLAMA / LAMINATE COATING

Oldukça fazla yüzey seçenekleri sunan bu malzeme, reçine çözültisi emdirilmiş kâğıtların üst üste konularak sıcak preste basınç altında sıkıştırılması ile elde edilmekle birlikte, kullanım dayanımı açısından oldukça fazla avantaj sunmaktadır. Zor çizilmesi, asidik maddelere karşı dayanıklılığı ve fiziksel avantajları açısından iç mekânlarda tüm kullanım alanlarında yaygın olarak tercih edilir.

This material, which offers quite a lot of surface options, is obtained by placing papers impregnated with resin solution on top of each other and compressing it under pressure in hot press, but it offers many advantages in terms of usage resistance. It is widely preferred in all areas of use indoors in terms of difficult scratching, resistance to acidic substances and physical advantages.
